

## MISSION FIELD POLICY

For all aircraft.

In an effort to utilize airport facilities to their fullest capability and promote safe flying, the following policies have been adopted by the City/County Joint Airport Board.

All aircraft are expected to comply with appropriate FAA rules and regulations.

Commercial aircraft operating from Mission Field are required to have proof of insurance, have current licenses and permits pertaining to their type of operation and comply with all FAA rules and regulations.

The facilities at Mission Field including water are not available for commercial use. If your operation requires a large volume of water, you will be asked to provide it from another source.

All airport users are expected to remove and/or clean up any debris pertaining to their use
