For Immediate Release:

First Positive COVID-19 Test Result in Park County

The first Park County resident to test positive with the COVID-19 virus is home recovering.

The Park County Health Department has begun their investigation to determine if any further testing or isolation of close contacts is appropriate.

The first positive case follows extensive testing of Park County residents by Livingston Healthcare. Test results are generally available within three days of testing.

Confirmed positive results will be shared immediately to help residents understand the occurrence of infection in our community. Compliance with Gov. Bullock's Stay Home Order beginning Saturday March 28 and other social distancing and hand-washing recommendations remain vitally important.

Please call Livingston HealthCare at (406) 222-3541 if you have symptoms including fever, dry cough, or shortness of breath.

Call the Park County Health Department COVID-19 Hotline with other questions, at (406) 222-4131.
