The Tom Miner Creek Road Capital Improvements Project is located approximately 40 miles Southwest of Livingston, Montana in Paradise Valley. The project work consists of removal and replacement of the two deteriorating short span concrete bridges over Tom Miner Creek and Rock Creek. The existing bridges will be replaced with longer and wider GRS-IBS bridges, riprap protection, and guardrail. The project will also include some rehabilitation work on the Carbella Truss Bridge consisting of replacing the existing bridge deck and repairing some of the truss members.

Current Operations

This week the Contractor continues with work on the Diversion Road with the placement of the eco blocks for the stream diversion. The Tom Miner Creek was running a little high this week with the rainfall and warmer temperatures but with some thinking and pre-planning the task of placing three culverts in on one half of the creek is complete. Going forward is shifting the stream diversion into the culvert pipes and installing the remainder three culvert pipes in the other half of the creek.

Once the culverts are set in place the goal is to finish with the placement of the gravel to complete the diversion road and then continue with the topping of roadway aggregate and the shaping of the slopes.

Traffic Control

Temporary Traffic Control and Detour signs are installed at the Tom Miner Creek bridge. The contractor has submitted notice to the local newspapers that delays will occur at Tom Miner Bridge. Traffic along Old Yellowstone Trail South will remain open until further notification while short delays expected at Tom Miner Bridge while a diversion road is constructed.

CONTRACT NO:
69056718C00009

AWARDED TO:
Pavkov Contracting Corp
Sumter, SC 29150
