OPENING DISCOVERY

Discovery from Montana Highway Patrol comes with a disc containing a program called AVViewer. To open the video file please follow the steps below:

1. On a computer, open the folder on the disc, often titled ICV
2. Click on the application file AVViewer

3. The application will take you to a window to select the file to open. You will need to click through several folders before you are taken to one with a variety of files for playback.
4. Sort the files by size by clicking the word size on the toolbar.

Name	Date modified	Type	Size
------	---------------	------	------

5. Click on the file with the largest size type. The program will open the application viewer (IMAGE)

6. The program may take *several minutes* to open.
7. Eventually it will open the viewer.

8. Click the play button to view.
