<b>Walk-In Freezers &amp; Refrigerators</b>	Quarry tile; aluminum; stainless steel; poured sealed concrete	Aluminum; stainless steel	Aluminum; stainless steel

\*FRP = Fiberglass Reinforced Plastic Panels

There must be coving at base junctures that is compatible to both wall and floor coverings; recommended to provide at least ¼ inch radius and 4” in height.

All floor coverings in food prep, food storage, utensil-washing areas, walk-in refrigeration units, dressing rooms, locker rooms, toilet rooms and vestibules must be smooth, non-absorbent, easily cleanable and durable. Anti-slip floor covering may be used in high traffic areas.

Any alternate materials not listed in the above chart must be submitted for evaluation.
